ALL-TERRAIN VEHICLE (ATV)

## Key features:

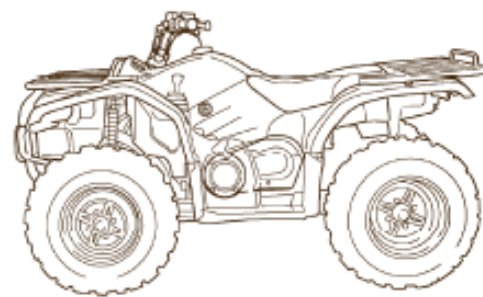

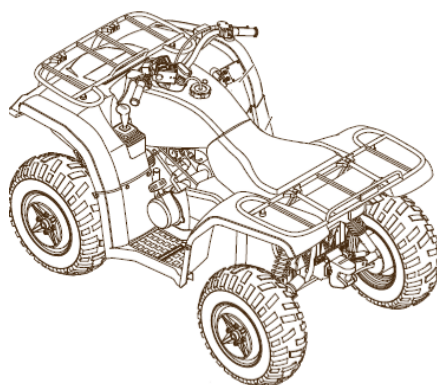

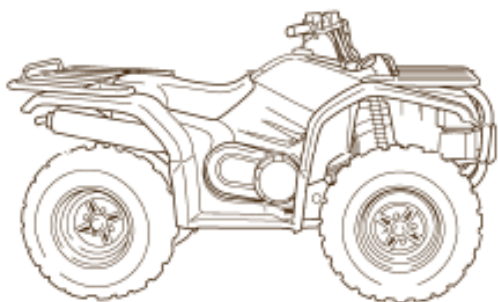

- Max Speed 46mph / 75kmh
- All Terrain Functional
- Infra-Red Front & Rear Lights
- Dual Throttle Fit
- Handlebar Controls

The Yamaha Grizzly is a four wheeled off-road vehicle powered by a single cylinder petrol engine. The engine has both electric and recoil starting, with an automatic gearbox, which can be operated in two-wheel or four-wheel drive. The vehicle is steered using the motorcycle design handlebars, on which are mounted the majority of the rider controls and manufactured by Yamaha.

The versatile Yamaha Grizzly is able to operate in conditions that few vehicles can match, delivering food, water and ammunition in difficult to access areas or where larger vehicles are not suitable, effectively moving alongside dismounted troops in both peacetime and operational roles.

Upgrades include a dual throttle fit offering greater manoeuvrability in all settings, combined with the ability to tow trailers, results in improved all round effectiveness.
